

Community Clean has over 14 years industry experience and understands the importance of getting the job right. Most of our work is carried out under the public gaze so we work hard to ensure a positive image; anything short of 100% could reflect badly on your organisation.

Cleaning

Primarily we are called in for clean-up operations on buildings and surfaces in urban locations. Access is never a problem as height or tricky locations are our speciality. Our key tasks are removing contamination, graffiti, fly-posters, chewing gum and general grime.

Services include;

Deep cleansing and sanitisation (internally and externally) | Graffiti removal | External cleaning including; facades, patios, decking, canopies and cladding | Void clearance | Fire damage cleaning | Lime scale removal, Chute cleaning including hopper heads and bin chambers | Waste/ Recycling container cleaning | Play area cleaning and Tennis court cleaning.

Protecting

As well as our cleaning expertise, we also provide innovative, cost-effective preventative measures. We have a wide range of anti-graffiti coatings, hygiene/durability coatings, anti-fly poster coatings, pavement impregnation (protects against gum and grime) and street furniture protection.

Services include;

Anti-Graffiti coatings | Hygiene coatings | Pavement protection | Cladding protection and Water silane impregnation.

Maintaining

Prevention is clearly better than cure, and many organisations employ us on a regular basis. With regular maintenance visits, we are able to keep locations cleaner, tidier and less prone to vandalism. Painting, repair and refurbishment are all ways in which a community can be kept looking its best.

Services include;

Algae control | Chute blockages | Waste/recycling container repairs | Play area maintenance | Tennis court maintenance **and much, much more!**
