Partners in Grime with Ecolab:

The challenge

Ecolab require us to provide a fast and effective service for various types of clean up operations, large or small.

What did we do

Community Clean have worked with Ecolab on numerous jobs over the last 12 months. The primary tasks we undertake on behalf of Ecolab are internal and external cleaning of contamination and graffiti removal. Whether it be from restaurants, public houses, hotels, shops, cinema's, leisure centres, private dwellings, court yards, roof tops, flyovers, viaducts and just about anywhere else! Access is never a problem as height or tricky locations are our speciality.

Community Clean has provided a fast and flexible scheduling facility which includes the option of night shifts to best suit the client.

To help develop our relationship and keep in touch with the exciting changes at Ecolab we are pleased to sponsor their Annual Pest Elimination Conference again this year.

The outcome

Our fully trained work force provides nothing short of a first class service and we work hard to keep our clients happy. After working with Ecolab over the last 12 months we have received glowing reports without one single complaint.

Cutting out the middle man keeps things simple for Ecolab, they only have to deal with one contractor. They use us as a reliable one-stop-shop for jobs of any size, in just about any location.

“When I’ve dealt with Community Clean, I’ve always found them to be courteous and friendly, and quick to respond to any requests for quotations, etc. Work has been carried out to a high standard, and also on time. Thanks for your help and support.”

Yvonne Adair BSC (HONS),
Account Executive, Ecolab – Pest Elimination UK and Ireland
