## Structure Refurbishment and Maintenance:

### The challenge

To provide a comprehensive structures refurbishment and maintenance service.

Our job is to bring each structure up to a high standard, making them easier to maintain in the future and improving peoples perception to promote a feeling of safety and cleanliness.

### What did we do

Community Clean has drawn on many years of experience and the latest innovations to achieve the best possible results.

Our services include; the application of durable anti-graffiti systems to provide surfaces that are easy to clean and maintain for years to come, durable anti-slip epoxy flooring, the application of industrial coatings for longevity (ICATS), stainless steel security mirrors that are vandal and graffiti proof, replacement wall tiles, rendering/repairs, deep cleaning, removal of concrete wash, mural design/application/repair/protection, height access and confined spaces.

Our clients include: EnterpriseMouchel, Balfour Beatty, Amey Highways, Ringway and Amey La Farge.

### The outcome

The results are clear – cleaner, safer and easier to maintain structures.

“Community Clean has become an approved sub-contractor for EnterpriseMouchel, who are the Managing Agent Contractor working on behalf of the Highways Agency, maintaining the motorway and trunk road network in central southern England.

EnterpriseMouchel needed a reliable and cost-efficient supplier who could deliver a first class result and achieve deadlines. Community Clean has responded in a very positive manner in the projects they have completed for the company to date.

Community Clean has demonstrated that they have a flexible, innovative and professional approach to refurbishing structures on the road network, which in turn has made it much easier for EnterpriseMouchel crews to maintain the assets they manage on behalf of the Highways Agency.”

**Mike Gelpi,**  
Network Structures Manager – EnterpriseMouchel, Area 3
