

Fact Sheet

Product: Magic Cote Pavement Protection (Impregnation)

Benefits

- P** Inhibits chewing gum
- P** Invisible, non-slip protection
- P** Will NOT effloresce
- P** Prevents surface soiling by fat, oil & grease
- P** UV resistant
- P** Hard wearing & durable
- P** Resistant to a wide range of aggressive chemicals
- P** Resistant to tyre marking
- P** Provides an easily cleanable surface
- P** Sustainable & environmentally friendly
- P** Simple, fast & easy to apply
- P** The treated area can be immediately opened to the public

Facts

Chewing gum is widely considered to be a major public nuisance and once trodden on, is extremely difficult to remove.

The ENCAMS Local Environmental Quality Survey 2003, showed that the issue of people dropping gum affects 67% of all areas.

Over 935 million packs of chewing gum are sold each year - it costs 3p per stick to buy and 10p to prise off the streets!

This porous surface protection system is so impressive that all pavements are now treated as standard in the City of Westminster.

The product is an aqueous solution that is virtually odourless, with limited VOCs and no specific COSHH. It is not a coating.

Community Clean is committed to improving the environment in which we live, using innovative systems that work!
